EDUCATION

Bachelor in Computer Science

- **Babeș-Bolyai University** of Cluj-Napoca, Romania
- **Oct 2025 – Present** | Expected Graduation Jul 2028
- **Relevant Courses:** Data Structures and Algorithms | Object-Oriented Programming | Operating Systems | Computer System Architecture

PROJECTS

Document Copilot

React | FastAPI | Supabase | OpenAI

- Developed a full-stack AI research assistant that enables financial analysts to query SEC filings in natural language and receive streamed answers grounded in cited source passages.
- Implemented hybrid document retrieval by combining semantic search with **pgvector** and PostgreSQL full-text search, using FastAPI, Supabase, and OpenAI to generate and validate evidence-based responses.
- Built a React and TypeScript chat interface with user authentication, conversation history, document citations, and source previews, and deployed the application using Railway and Supabase.

ParcelFlow

C++17 | Qt 6 | SQLite

- Developed a desktop parcel-delivery management application with parcel tracking, persistent customer and delivery data, status history, input validation, and multiple synchronized GUI views.
- Implemented automatic agent assignment based on street coverage, delivery radius, and nearest-agent selection, supported by database transactions and **eight automated integration tests**.
- **GitHub:** github.com/DavidUriesu/Parcel-Flow

Pygame Snake

Python | Pygame | unittest

- Built a configurable Snake game featuring dynamic board and apple settings, progressive difficulty, keyboard controls, and pause, restart, game-over, and victory states.
- Separated the application into domain, game-service, and UI layers, with **15 automated tests** covering movement, growth, collision detection, apple placement, validation, and speed progression.
- **GitHub:** github.com/DavidUriesu/Pygame-Snake

Fitness Content Creation

TikTok | Video Editing | Communication

- Created and edited **50+ short-form videos** over more than two years, combining advanced bodyweight exercise showcases with accessible fitness and nutrition advice.
- Grew the account to **over 500 followers**, with the top-performing video surpassing **5,000 views**, while developing skills in video editing, communication, and audience engagement.
- **TikTok:** [tiktok.com/@uriesu_david](https://www.tiktok.com/@uriesu_david)

SKILLS

- **Languages:** Python | C++ | TypeScript | SQL
- **Frameworks & Technologies:** React | FastAPI | Qt 6 | Pygame | Supabase | PostgreSQL | SQLite | pgvector | OpenAI API | Git

ACHIEVEMENTS

- **Bronze Medal**, Romanian National Computer Science Olympiad (Apr 2022)
- **First Ascent, Bending Spoons:** selected as one of Romania's top 20 computer science students for a three-day fully funded event at the company's HQ in Milan, Italy (Jun 2024)
